Module contents

battlemuffin.hooks package

Submodules

battlemuffin.hooks.handlers module

```
class battlemuffin.hooks.handlers.request_handler (auditor, requires_consumer=False)  
    Bases: uplink.decorators._BaseHandlerAnnotation, uplink.hooks.RequestAuditor
```

Module contents

1.1.2 Module contents

Python Implementation of Blizzard's Web API

BattleMuffin officially supports Python 3.6-3.8.

2.1 Requirements

This package requires client credentials from Blizzard.

You can find out more about how to generate these credentials for your project at the [Blizzard Developer Portal](#).

2.2 Quick Setup

Some easy examples to get you started!

```
from battlemuffin.clients.warcraft_client import WarcraftClient

client = new WarcraftClient("CLIENT_ID", "CLIENT_SECRET")
response = client.get_achievement_categories_index()
```

It is possible to specify a region, using its default locale

```
from battlemuffin.clients.warcraft_client import WarcraftClient
from battlemuffin.config.region_config import Region

client = new WarcraftClient("CLIENT_ID", "CLIENT_SECRET", Region.eu)
response = client.get_achievement_categories_index()
```

It is also possible to specify both the region and locale

```
from battlemuffin.clients.warcraft_client import WarcraftClient
from battlemuffin.config.region_config import Region, Locale

client = WarcraftClient(client_id, client_secret, Region.eu, Locale.es_ES)
response = client.get_achievement_categories_index()
```

2.3 Installation

To install the latest stable release, you can use pip (or pipenv):

```
$ pip install -U battlemuffin
```

2.4 Implemented Endpoints

World of Warcraft (Retail):

CHAPTER 3

Changelog

All notable changes to this project will be documented in this file.

The format is based on [Keep a Changelog](#), and this project adheres to the [Semantic Versioning](#) scheme.

3.1 0.1.11 - Unreleased

3.2 0.1.10 - 2020-07-12

Updated - Updated retry logic to only retry on 429 and 504

3.3 0.1.9 - 2020-07-02

Updated - Updated retry logic to retry on all verbs, not just default idempotent ones

3.4 0.1.8 - 2020-07-02

Updated - Failed to mount HTTPS for retries in previous versions

3.5 0.1.7 - 2020-07-02

Updated - Blizzard API has a habit of aborting connections. BattleMuffin will now retry when this happens

3.6 0.1.6 - 2020-05-03

Added

- Created `get_auctions_raw_response (connectedRealmId)` endpoint for returning the raw auctions response so headers can be analyzed.
- Created `get_auctions_if_modified_since (connectedRealmId, if_modified_since)` endpoint for returning raw auctions response if the Last-Modified header is after a given date. This date must adhere to the standard format `"%a, %d %b %Y %H:%M:%S %Z"`. If the data is not modified, a 304 status code will be returned.
